Annual Report on Tree Plantation 2022-23

According to a recent World Meteorological Organization (WMO) study, records for greenhouse gas levels, surface temperatures, ocean heat and acidification, sea level rise, Antarctic sea ice cover, and glacier retreat were once again broken—and in some cases smashed. With a worldwide average near-surface temperature 1.45 °C (with a margin of error of ± 0.12 °C) over the pre-industrial baseline, the WMO study verified that 2023 was the warmest year on record. That ten-year span was the warmest on record.

The National Farmers' Day marks the birth anniversary of Farmer leader and the 5th Prime Minister of India, Chaudhary Charan Singh. The Kisan Diwas 2022 is celebrated for 'Delivering Smart Solutions for Sustainable Food Security and Resilience'. On the occasion of Farmers day the tree were planted in college ground and to remember people of the value of nature, and to increase awareness of the issue, this time, trees were planted on the college grounds, and students were encouraged to maintain a pollution-free and clean environment.
